Internship in Biostatistics at the Harvard T.H. Chan School of Public Health

June 12, 2016 - July 23, 2016
Application Due: February 1, 2016

Eligibility & Requirements
If you like mathematics and would like to learn how quantitative methods can be applied in the study of human health, consider applying to the internship in Biostatistics at the Harvard T.H. Chan School of Public Health. The program will introduce you to the power and excitement of math applications to public health, medicine, and biology, and provide you experiences that will help inform your future career path.

Post-Baccalaureate Internship
The 3-month internship program is for post-bacs interested in or planning to attend a graduate degree program in biostatistics. Past summer program participants are encouraged to apply. Travel is provided and interns will receive a salary for their participation in the post-baccalaureate program. Interns will participate in collaborative research projects through three, one-month long rotations at academic and clinical centers at Harvard. They will attend regular seminars at Harvard and Dana Farber Cancer Institute on biostatistical topics. They will also attend the annual Pipelines Into Biostatistics Symposium in July 2016 and return the next summer to present their research at our 2017 Annual Symposium.
