A full-time research assistant position is opening in the Kable Lab at the University of Pennsylvania, to begin in the summer of 2015. At least a one-year commitment is preferred. The lab uses functional imaging, noninvasive brain stimulation and behavioral testing in both healthy participants and those with brain damage to investigate the psychological and neural mechanisms of decision making. Responsibilities include designing and conducting experiments, analyzing data, and managing administrative tasks. Requirements include a Bachelor’s degree (preferably in psychology, neuroscience, or a related field) and strong computer skills. The ideal candidate would be a highly organized, motivated individual with an interest in the field of neuroscience or psychology and experience working in a research setting. If interested, please prepare a resume, a cover letter detailing your background and interests in the position, and contact information for at least three professional references. Applications must be submitted on Jobs@Penn, reference #02-19677.

Thank you,

The Kable Lab
