

Learning Lab Undergraduate Fellow

The Bok Center's Learning Lab is looking for undergrads with special interest or prior training in **Neuroscience** to join our community of students as Learning Lab Undergraduate Fellows. Our fellows are responsible for helping Harvard faculty members design and test assignments for current courses and courses in development.

Requirement:

- Prior coursework LS1a and an interest in neuroscience

Preferred Experience in:

- MCB80 or MCB81

Work Responsibilities:

- Testing educational materials and processes
- Assisting with the development of problem sets, assignments and activities
- Comfortable being in front of a camera, and additionally being interviewed, recorded and observed interacting with new technologies and teaching approaches.
- Willingness to experiment with new tools, software, and bodies of knowledge. There is no need to be an expert in one thing!
- Ability and desire to work effectively as a team.

Pay is \$15/hr. ***Students will meet on Wednesdays between 10-2PM and on Thursdays between 1-4PM***

Any questions about the position can be directed to Sadikshya Nepal: snepal@fas.harvard.edu.

Interested undergraduate students should submit a resume to learninglab@fas.harvard.edu.
