

Research Coordinator, Department of Psychology, Drexel University, Philadelphia, PA

Applicants are being sought for one research coordinator position in the [Laboratory for Innovations in Health-Related Behavior Change](#), Department of Psychology at Drexel University in Philadelphia, PA, under the direction of Meghan Butryn, Ph.D. Dr. Butryn is conducting multiple NIH-funded clinical trials in the areas of physical activity promotion, weight loss maintenance, the use of acceptance-based behavioral approaches to obesity treatment, and technology-aided behavior change.

Coordinator responsibilities will include: scheduling and conducting participants' clinical research assessments; managing data and coordinating data collection; maintaining contact and approvals with NIH and IRB; and supervising part-time research assistants. Opportunities also will be available, as desired, for additional data analysis and preparation of poster presentations and/or manuscripts related to the projects. Coordinators also have the opportunity to be exposed to and involved in treatment provision.

Candidates should have a bachelor's degree and coursework and/or work experience related to clinical research. This position is excellent preparation for individuals who wish to pursue graduate study in clinical psychology or a related area. Ideally, candidates will be available to begin full-time work no later than June 12, 2017.

To apply, please complete the questionnaire below, upload your CV, and submit using the >> button by February 8th.
