

RA Position in Translational Neuroimaging Lab at Albert Einstein College of Medicine in New York

RA Position available at the Translational Neuroimaging Lab at Albert Einstein College of Medicine in New York. The lab focuses on the use of noninvasive neuroimaging to understand the brain basis of both normal and abnormal human cognition, behavior and function and to identify its underlying mechanisms in order to open the door to new approaches to diagnosis and treatment. It is a two year position.

Interested students should send their resumes to chloe.ifrah@einstein.yu.edu
