Description
The psychometrician will be responsible for organizing, administering, scoring and data entry of standardized psychological tests to patients with a wide range of neurocognitive disorders, including children and adults. The psychometrician will be expected to perform these duties independently with minimal supervision, with supervision of Chief Neuropsychologist available to handle unusual situations and to periodically review work.

The psychometrician will collaborate with staff neuropsychologists and clinicians in the assessment of clinical patients, and will be involved in assessment of patients enrolled in clinical and research studies conducted at MGH Chelsea Behavioral Health Department. The psychometrician will work independently and as a team member and will be expected to help with analyzing data and with preparing presentations. The psychometrician will help with training/teaching testing and scoring to new psychometricians and provide help to orienting trainees as needed.

- Ability to interact with diverse staff and patient populations, including adults and children
- Strong organizational skills and ability to multi-task
- High degree of computer literacy and analytic skills
- Off-site community mental health clinic located in Chelsea, MA at MGH Chelsea on the 4th floor. Private and shared space with neuropsychologist and psychometricians; separate work station.

Qualifications
Required:
- Minimum of 1-2 years of related experience, preferred.
- Prior experience or knowledge of psychological test administration preferred but not required.
- Experience and/or interest in working with children is necessary
- Bachelor’s Degree in Psychology or related field

EEO Statement
Massachusetts General Hospital is an Equal Opportunity Employer. By embracing diverse skills, perspectives and ideas, we choose to lead. Applications from protected veterans and individuals with disabilities are strongly encouraged.
