

**Clinical Research Coordinator at MGH's  
Cardiac Psychiatry Research Program**

We are seeking a full-time clinical research coordinator (to begin work in Summer 2019) to provide assistance on clinical research projects that study the effects of a new psychological treatment on healthy behaviors (e.g., diet, exercise) in people with heart disease or diabetes. The coordinator would be trained by our multidisciplinary Cardiac Psychiatry Research Program team and would work closely with the research program's head physicians and psychologists. This position is ideal for someone who is interested in pursuing graduate work in psychology, is planning to attend medical school, or who has an interest in public health. Our program seeks to provide personalized mentoring and training to research coordinators and to foster participation in presentations and publications.

This position is performed on the medical Main Campus of Massachusetts General Hospital in Boston, MA. Additional information about our program, studies, and team can be found at <http://www.massgeneral.org/psychiatry/research/researchlab.aspx?id=1570>

If you are interested in applying, please include an up-to-date résumé or curriculum vitae and a cover letter outlining how your interests and experience would make you a good fit for this position. Please apply directly to the MGH job search website: <http://www.massgeneral.org/careers/jobsearch.aspx> ; Job # 3079786
