Full-Time Lab Manager at Brown University's Shenhav Lab

The Shenhav Lab (www.shenhavlab.org) is seeking a full-time lab manager. Our lab studies the cognitive neuroscience of affect, decision-making, and cognitive control. To accomplish this, we use a combination of behavioral measures, psychophysiology, neuroimaging, and computational models.

The successful candidate will play an integral role in every stage of research, including (1) stimulus/task development, (2) recruitment and collection of human subject data (behavioral and neuroimaging studies), (3) analysis/modeling of data, and (4) assisting in the preparation of grants and manuscripts. In addition, in their managerial capacity they will perform administrative duties (e.g., IRB administration, purchasing) and help train and supervise lab personnel (e.g., undergraduate research assistants).

This position will in turn expose the individual to a wide array of theoretical and methodological approaches in psychology and neuroscience, providing an excellent launching pad for future graduate studies.

The ideal start date is May or June of 2019, but we will be considering candidates available earlier or later.

QUALIFICATIONS:
- Requires a Bachelor's degree (in psychology, cognitive science, neuroscience, computer science, or related field) and research experience in a psychology or neuroscience lab (minimum 1-2 years preferred)
- Proficiency with a programming language such as Matlab or Python is strongly preferred, and special consideration will be given to individuals with experience collecting and/or analyzing neuroimaging data (or similarly complex datasets).

HOW TO APPLY:
- Follow this link: https://brown.wd5.myworkdayjobs.com/staff-careers-brown/job/Metcalf-Research-Lab/Research-Assistant_REQ150300.
- Please also email your CV, a brief (bulleted) summary of your research interests and technical expertise (including programming background), and the contact information for three references to shenhavlab.brown@gmail.com.
