

Full-Time Research Assistant at the Stanford Social Neuroscience Lab

The Stanford Social Neuroscience Lab (PI: Jamil Zaki) invites applications for a full-time research assistant position, to begin in Summer or Fall of 2019, for a term of at least 1 year. Candidates can find out more about our lab and the work we do [here](#) and [here](#).

We seek a highly motivated individual with a BA or BS in Psychology or Neuroscience to assist Dr. Zaki and members of his lab on a large, collaborative project combining social network analysis, experience sampling, and neuroimaging. The RA will be responsible for providing various forms of research-related support, including recruitment, running, and payment of human subjects, stimulus and paradigm development, and data maintenance and analysis. This individual will form a key part of a multi-person team; as such, exceptional organizational and interpersonal skills are required. A background in neuroimaging research, social network analysis, and/or programming is preferred, but not required. Interested candidates can find application materials [here](#).
