Dr. Lauren Hoffman and her research team at the Massachusetts General Hospital’s Recovery Research Institute, within the Center for Addiction Medicine, are currently accepting applications for a clinical research intern. We are seeking highly motivated and organized students majoring in psychology or a related science who are looking to gain clinical research experience while working as part of our research team. Dr. Hoffman’s research focuses on opioid use disorder treatment and recovery. More specifically, her NIH-funded work seeks to characterize longitudinal neuropsychological change and its relationship to recovery outcomes among individuals undergoing pharmacotherapy for opioid use disorder (i.e. buprenorphine and methadone treatment). Daily intern tasks may involve but are not limited to maintaining and organizing datasets, assisting with study eligibility screening procedures and participant study visits, and preparing documents for publication. Applications will be accepted on a rolling basis. A start date in the Winter/Spring of 2019 and commitment through one or more academic years is preferred. If you are interested in applying, please contact Dr. Hoffman at lhoffman1@mgh.harvard.edu. Please be sure to include:

1. Curriculum vitae or Resume
2. Unofficial transcript with cumulative GPA
3. Informal list of:
   a. the courses you are taking this semester (include your anticipated final letter grade or current letter grade in the class)
   b. courses you plan to take next semester
4. Cover letter (max 1 page) describing:
   a. Your interest in research and addiction psychology
   b. Your anticipated post-graduation plans (i.e. anticipated career trajectory & date of graduation)
   c. Any additional information relevant to the position (i.e. previous research experience, anticipated start date, anticipated duration of internship, etc.).
