The Cognitive and Neural Organization Lab, under the direction of Talia Konkle, is looking for two students interested in summer research internship. Current undergrads and recent grads are invited to apply. Ongoing research projects in the lab explore how our we recognize and process objects, scenes, and the actions of others, using behavioral, neuroimaging, and computational methods.

The position will start on 06/04/18 and end on 08/03/18 (with some flexibility in dates). This is a full-time position, with a stipend of $2500. This is an excellent opportunity for students interested in psychology and cognitive computational neuroscience to get some hand-on experience with research.

To apply, please send an email to Emilie Josephs at ejosephs@g.harvard.edu. Please include a short cover letter introducing yourself and your interest in psychology, and a resume/CV.

The application deadline is 04/30/18.
