

**Post Graduate Research Assistant
at Yale OCD Research Clinic of Psychiatry Department, Yale School of Medicine**

We are seeking applicants for a Post-Graduate Research Assistant position for a project that applies drift-diffusion models to examine perceptual and value-based decision making in obsessive-compulsive disorder (OCD) at the behavioral and neural levels.

This is a one-year position, with a possibility to expand for an additional year. The position is full-time. Available immediately. Will be filled as soon as a suitable candidate is found. The research assistant will work closely with study participants from clinical and healthy populations, conduct clinical assessments, collect and analyze behavioral and neuroimaging data, work on manuscripts preparation.

We're looking for applicants with a variety of backgrounds, experience with behavioral research is a plus. The most important qualifications are that you're smart, curious, driven, computer-savvy and great at communicating.

Interested applicants please send your interest, resume, and/or questions to **helen.pushkarskaya@yale.edu**.
