

Looking for research experience before applying to graduate school or medical school? Join our team to work on NIH-funded behavioral research studies with parents, children, teens, and young adults surrounding cancer.

We are hiring up to 2 full-time paid staff positions with a competitive benefits package. If you are interested in health and looking for ways to prepare for graduate, public health, nursing, or medical school, then consider becoming part of a collaborative clinical and community research team under the supervision of Dr. Kenneth Tercyak at Georgetown University in Washington, DC.

Job Responsibilities Include:

- Assisting with the development and implementation of health and behavior research studies
- Coordinating clinical intervention trials, including scheduling and tracking participant recruitment, retention, and follow-up completion
- Recruiting and enrolling online and community participants (e-data collection)
- Data entry/management/processing
- Training and supervising undergraduate volunteers and delegating lab responsibilities
- Assisting with editing scholarly works
- Collaborating with the Institutional Review Board (IRB) to maintain research compliance
- Initiating and overseeing contractual agreements with study vendors

Research Opportunities Offered:

- Experience with prospective, clinical, community, and online research studies with potential for presentations and publications
- Working collaboratively with healthcare professionals from a range of disciplines
- Excellent preparation for graduate school in psychology, public health, nursing, or medicine

Requirements:

Bachelor's degree (by time of start) with interest in and/prior experience with clinical (human subjects) research; One-year minimum commitment, with option of longer-term position; Evening hours for study telephone calls.

Additional Recommended Qualifications:

Knowledge of, and experience in working with, IRBs; Experience using data processing and statistical software (e.g. REDCap, Microsoft Excel, SPSS); Experience working in clinical and community settings, advanced coursework in social/behavioral science.

Salary commensurate with experience. To apply, send a letter of interest, resume, and anticipated availability to: Dr. Glynnis McDonnell (gm985@georgetown.edu) with "RA Position" in the subject line. Review of applications will begin immediately.
