

Research Assistant Position at Brown University's Mood and Behavior Lab

Overview:

RAs will work under the mentorship of Dr. [Richard Liu](#) in the Mood and Behavior Lab, assisting primarily with two NIMH-funded studies using computational methods to model neurocognitive markers and ambulatory indices (i.e., mobile technology including actigraphy, physiological arousal, and ecological momentary assessment) of short-term risk for suicidal behavior in adolescents.

Duties & Responsibilities:

Responsibilities will include: data collection and management; participant recruitment, retention, and reimbursement; interfacing with the hospital clinical staff and participants recruited from the adolescent inpatient units; supervision of undergraduate volunteers; and IRB submissions and modifications. There may be opportunities to conduct independent research, receive training in grant writing, submit presentations to national conferences, and prepare manuscripts for publication. This position is particularly suited for individuals interested in gaining research and clinical experience prior to graduate school.

Qualifications:

The ideal candidate will have a Bachelor's degree in psychology or related field, be very detail oriented, have excellent oral and written communication skills, and be able to work autonomously as well within a collaborative team environment. Experience with data management and statistical software (e.g., SPSS, Mplus, R) and with writing scripts in E-Prime are preferred but not required.

Application information:

Applications will be considered on a rolling basis. To apply, please submit a cover letter and CV to: teenmoodandbehavior@brown.edu
