

The [IMPACT Lab](#), directed by Anna Van Meter, PhD, is looking for a full-time post-baccalaureate research assistant. Our research aims to integrate technology with traditional mental health approaches to gain knowledge about the etiology, course, and treatment of mood disorders in youth.

Responsibilities will include recruitment of participants (both children and adults), management of study procedures, communication with clinicians and research collaborators, maintenance of study records, interaction with other internal groups (e.g., Office of Grants and Contracts, the Institutional Review Board), and completion of administrative tasks, as necessary. Opportunities to collaborate on other activities, including conference presentations and manuscripts, will also be available.

We are looking for someone enthusiastic and organized with prior research experience and excellent communication skills. The position will begin in early summer. Our lab is based at Zucker Hillside Hospital in Queens, NY.

In order to apply, please send your CV, an unofficial transcript, an e-mail stating your interest, and three letters of reference to impact.research.lab@gmail.com. Candidates selected for further consideration will be contacted with more details. Please send your materials by May 7, 2021 for full consideration.

If you have questions, please contact Anna Van Meter at avanmeter@northwell.edu.
