

Applicants are being sought for several full-time research coordinator positions in Drexel University's Center for Weight, Eating and Lifestyle Science (WELL Center).

The positions are under the direction of Dr. Evan Forman, Dr. Meghan Butryn, and Dr. Stephanie Manasse. The NIH-funded clinical trials seeking coordinators include:

- (1) a study using artificial intelligence technology to optimize remote treatment for obesity
- (2) a project testing approaches to obesity prevention in young adulthood,
- (3) a study testing the efficacy of an inhibitory control training for binge eating disorder or bulimia nervosa, and
- (4) a project examining how decision-making influences disordered eating behavior in adolescents.

These positions provide excellent preparation for individuals who wish to pursue graduate study in clinical psychology or a related area, including opportunities to submit presentations to conferences, co-author papers, assist with grant applications, and be exposed to clinical interventions.

For more information and to apply, please visit [this link](#). In addition, you must notify us that you have applied, and provide us some supplemental information using [this form](#). Start dates are expected to be June 1, 2021, but some flexibility may be possible.
