

The Cognition and Affect Regulation Lab, directed by Dr. Jonathan Stange in the Department of Psychology at the University of Southern California (USC), is seeking a full-time benefits-eligible lab coordinator position. Our lab seeks to identify cognitive and affective processes that are involved in the regulation of negative affect, in an effort to understand vulnerability factors for mood disorders and suicide. This work involves laboratory-based measures of brain activity (using fMRI), autonomic nervous system functioning (electrocardiogram and respiration), and behavior (executive functioning tasks and questionnaires). In addition, to understand behavior outside of the lab in the real world, we utilize ambulatory assessment to measure fluctuations in autonomic functioning (with wearables), sleep quality (with actigraphy), affect and regulation strategies (using ecological momentary assessment), and digital phenotyping approaches to measuring behavior (using smartphone keyboard metadata).

This position is ideal for a recent graduate from a Psychology, Neuroscience, Cognitive Science, or other STEM program who is interested in gaining clinical research experience in mental health and/or neuroscience in preparation for graduate or medical school.

**Duties and Responsibilities:**

- Employing various tools and recruitment efforts to enroll and retain young adults with major depression, suicidal ideation, or healthy controls (e.g., social media, digital advertising, referral management, advocacy outreach)
- Data management and participant tracking
- Conducting diagnostic interviews to assess history of psychopathology
- Interacting with participants and as they participate in the study protocols (using neuroimaging, psychophysiology, ambulatory, and behavioral methods)
- Preprocessing psychophysiological and neuroimaging data
- Assisting with other lab tasks (e.g., data entry, generating reports for data analysis)
- Managing laboratory staff (e.g., undergraduate volunteers) and delegating duties efficiently

**Required Qualifications:**

- Bachelor's degree in psychology, neuroscience, or related field required.
- Previous experience working with human subjects and conducting independent research projects.
- Excellent analytical skills, the ability to resolve technical or research problems (troubleshooting) and the ability to critically check data to prevent errors.
- Knowledge and adherence of clinical research methods and design, and research protocols.
- Extremely careful attention to detail (required for data entry and processing of neuroimaging, psychophysiology, ambulatory, and behavioral data).
- Excellent planning, organization, and prioritization skills, with the ability to independently monitor and complete a variety of complex tasks.
- Strong interpersonal skills and excellent communication, organization, presentation and computer skills.
- Ability to work effectively as part of a team (e.g., share duties with other research assistants when recruiting and running study participants; complete components of data analysis, slide presentations and manuscript preparations with the PI).
- Ability to complete work remotely (e.g., computer and internet access at home) as may be required during pandemic

**Additional Desirable Qualifications:**

- Experience with processing physiological and/or fMRI data (e.g., Biopac, Matlab, SPM, AFNI, FSL, Freesurfer).
- Experience working with patients with mood disorders including familiarity with clinical assessments.
- Proficiency with database management (e.g., merging multiple data sets from various sources).
- Programming experience (e.g., Python, Matlab).

**To apply or for more information:**

Please apply and submit your resume/CV, cover letter detailing your interest in and perceived fit for the position and how it aligns with your career goals, and contact information for three references to Dr. Jonathan Stange at [jstange@usc.edu](mailto:jstange@usc.edu). Please also submit a formal application at the following link: [https://usc.wd5.myworkdayjobs.com/ExternalUSCCareers/job/Los-Angeles-CA---University-Park-Campus/Research-Lab-Tech-II\\_REQ20091457](https://usc.wd5.myworkdayjobs.com/ExternalUSCCareers/job/Los-Angeles-CA---University-Park-Campus/Research-Lab-Tech-II_REQ20091457). Applicants are encouraged to submit their materials as soon as possible. Review will be on a rolling basis until the search is successful. The lab will be moving to USC from the University of Illinois at Chicago in August 2020. More information about the lab currently is available here:
