Student Research Assistant with The Football Players Health Study at Harvard

The Football Players Health Study at Harvard University is a research initiative focused on improving the health and well-being of former professional football players. We are developing new strategies for diagnosing, preventing, and treating injuries and illnesses that continue to impact the health and careers of former players. The study will strive to meet its aims by collecting data directly from players, by supporting innovative research through pilot awards, and by investigating ethical considerations of players’ conditions.

Duties and Responsibilities:
The Student Research Assistant will help to implement this emerging research program. They will support the processing of incoming study data through data entry and coding as well as providing assistance with outreach efforts including mailings, answering phone calls, and other study projects as needed.

Qualifications and Required Skills:
1. General interest in medical and health research.
2. Experience with data collection and spreadsheet software.
3. Excellent organizational skills and attention to detail.
4. Strong communication and interpersonal skills.
5. Self-motivated; ability to complete work and meet deadlines.

Working Conditions:
Normal office environment; some lifting and carrying of mail bins/questionnaires will occasionally be required.

To apply, please submit resume and cover letter to Bryan Cortez, Bryan_Cortez@hms.harvard.edu.
