Summer Position with Dr. Damian Stanley and Dr. Dominic Fareri at Adelphi University

The Gordon F. Derner School of Psychology at Adelphi University is seeking a motivated graduate student, RA or postdoc to assist with the development of lab practicals for a new, hands-on Neuroscience Practicum course being designed by Drs. Damian Stanley and Dominic Fareri. This time-limited, paid position is restricted to the summer and will be for 8 weeks beginning on June 3, 2019. The candidate will be expected to devote 15 hours per week and will be paid a total of $1800. This position will require consultation and regular meetings via Skype with Drs. Stanley and Fareri, but does not require in person meetings or for the work to be conducted at Adelphi. The ideal candidate will have the following skills/abilities:

- Demonstrated programming/scripting skills in MATLAB, bash, and Python.
- Demonstrated experience processing and analyzing EEG data within EEGLab.
- Experience developing lab course material for undergraduate courses.
- Strong organizational, writing, and collaborative abilities.
- Extensive experience with Powerpoint and/or Keynote.
- Experience with Stimulus Presentation Software (e.g. PsychoPy, E-Prime).

Interested candidates should send a CV and cover letter describing their experience/fluency with the above skill sets to gadamo@adelphi.edu.

Any questions regarding the position should be directed to either Damian Stanley (dstanley@adelphi.edu) or Dominic Fareri (dfareri@adelphi.edu).
