

## **Two Full-time Study Coordinator Positions for fMRI Projects**

Two Full-time Study Coordinator Positions for fMRI Projects are available immediately at the University of Michigan, Department of Psychiatry (PIs: Dr. Stephan F. Taylor, Dr. Ivy F. Tso). The person in this position will have responsibility for the recruitment and coordination of NIMH-funded research studies. Studies include fMRI studies of social cognition, pharmaco-fMRI and combined fMRI-TMS studies in healthy populations, and in patients with serious mental illness (schizophrenia, bipolar disorder). The appropriate candidate will learn the basics of a clinical translational research project in affective neuroscience, but some prior experience in this area is preferred.

The person will work closely with clinical staff to identify and recruit potential participants for studies, run fMRI scans, and maintain behavioral and imaging files. Job responsibilities may also include clinical assessment, and/or technical tasks. Good organizational skills and attention to detail are critical. Clinical experience with psychiatric populations is highly desirable, including good interpersonal skills and flexibility for work in diverse settings. We are looking for candidates with a Bachelor's degree in psychology, neuroscience, or a related STEM discipline. Basic computer skills (word processing, internet searches, spread sheets) and elementary statistics are required; familiarity with higher-level programming/scripting languages (MATlab, ePrime) would be a plus.

Opportunities to learn fMRI analysis and data interpretation for the highly motivated candidate will be offered. A competitive salary and benefits package will be provided. Interested candidates please send a cover letter describing relevant experience and interest in the position, CV, and names of 3 references via email to Ms. Laura Stchur [lmachine@med.umich.edu](mailto:lmachine@med.umich.edu).

For more information of our research programs, see <https://medicine.umich.edu/dept/psychiatry/programs/prep> and <https://sites.lsa.umich.edu/ivytsolab/>. The University of Michigan is an equal opportunity employer.
