Applications are being sought for a part-time research assistant position (approximately 25 hours per week) in the Personality and Dysregulation Lab of Dr. Naomi Sadeh at the University of Delaware. The lab is currently conducting studies designed to look at the brain networks that contribute to impulsive and harmful behaviors in adults with and without mental illness. For this position, we are looking for individuals with research experience, preferably in psychology or neuroscience, who are interested in working with adults with mental illness and/or conducting clinical neuroscience research. Preference will be given to individuals with a Bachelor’s Degree or higher, strong organizational skills, experience working in research teams, and a demonstrated ability to work well with others. Knowledge of neuroimaging data analysis is desired. Responsibilities will include facilitating recruitment of research participants, active involvement in data collection/analysis, and coordinating day-to-day operations in the lab. We anticipate a start date of November 1st, 2017.

If you are interested in being considered for the position, please send a current CV or resume, a brief statement of interest, and the names of three professional references to Dr. Naomi Sadeh at nsadeh@udel.edu.
