A full-time research assistant position is available for individuals at the BA level at the University of North Carolina at Chapel Hill, beginning summer 2018. The position will involve assisting/coordinating a federally-funded study of adolescent girls' depression and self-injury. The project involves the use of structured diagnostic assessment, questionnaire assessments, longitudinal methods, and an observational paradigm integrating cognitive and biological models of stress reactivity. This position is for 1-2 years. Research assistants will receive substantial training in developmental psychopathology theories and methods, the use of observational paradigms, physiological data collection, participant recruitment; data management; supervision of undergraduate research assistants; general research administration; and assistance with the preparation of grants and manuscripts. This position offers excellent experience for applications to doctoral programs in clinical or developmental psychology, as well as other mental health fields.

Applicants with some experience in psychology research are particularly encouraged to apply. A Bachelor’s degree in Psychology or a related field is required. Salary will be commensurate with qualifications. Interested applicants should submit a vita/resume and the names and emails of two references to mitch.prinstein@unc.edu and mgc12@live.unc.edu. Review of applications will begin immediately. Applicants will be contacted only if selected for further consideration.
