Full-time Research Coordinator Sought for NIH-funded Behavioral Weight Loss Trial

The Center for Weight, Eating and Lifestyle Science at Drexel University (the WELL Center; [drexel.edu/wellcenter](http://drexel.edu/wellcenter)) is currently recruiting a full-time research coordinator under the supervision of Evan Forman, Ph.D., to begin in Summer 2019. This position is under the direction of Dr. Evan Forman, who is conducting funded research aimed at developing and evaluating novel behavioral- and technology-based interventions for obesity and other health concerns. In particular, the coordinator will manage a new NIH R01-funded project aimed at evaluating the independent efficacy of specific components of mindfulness and acceptance-based behavioral treatment for weight loss.

This position is an excellent opportunity to gain experience in health behavior change research, and to be trained in both research and clinical tasks. Furthermore, the position provides excellent preparation for individuals who wish to pursue graduate study in clinical psychology or a related area. The WELL Center is staffed by faculty, post-doctoral fellows, research coordinators, clinical psychology Ph.D. students, Masters students and undergraduate students, providing an environment rich in intellectual stimulation and mentorship. Opportunities will be available for grant application preparation, research diagnostic assessment training, additional data analysis, and preparation of poster presentations and/or manuscripts related to the projects. Coordinators also have the opportunity to be exposed to treatment provision.
