Project Coordinator and Research Assistant Position opening at the Yale Stress Center, Yale University School of Medicine.

Full-time project coordinator and/or research assistant positions are open starting Spring-Summer 2022 to help coordinate and implement ongoing studies at the Yale Stress Center focused on stress, emotions, and addiction, with an emphasis on NIH-NIDA and NIAAA funded studies testing the efficacy of pharmacologic treatments to reduce alcohol and substance use outcomes, using various cutting edge web-based and smartphone-based data collection tools as well as human experimental and neuroimaging procedures to identify biobehavioral markers of treatment response. There are three primary responsibilities for the position: (1) Study coordination and oversight, including but not limited to administering research assessments, overseeing recruitment, retention, and tracking of study participants, and supervising and training post-graduate assistants, (2) Data collection, including self-report, interview, behavioral, biological, diagnostic and/or fMRI, and assessments at substance use treatment centers and public locations in the greater New Haven area, (3) Data entry, management, and analysis. The qualified candidate will have a Bachelor’s or Master’s degree from an accredited college with a specialization in psychology (or a related field) or any combination of subsequent education and experience. Experience/skills in consenting and administering assessments with research participants, working with clinical populations and individuals from diverse backgrounds, communicating effectively both orally and in writing, and working in a team setting is preferred. Interested candidates should contact Professor Rajita Sinha (rajita.sinha@yale.edu) or Dr. Stephanie Wemm (stephanie.wemm@yale.edu) and submit a cover letter, CV/resume, and list of 3 references.

Full-time Postgraduate Position Available
Department of Psychiatry
Yale University School of Medicine

We are currently seeking a full-time Postgraduate Associate (paid) for NIH-funded multimodal neuroimaging research in the Department of Psychiatry at Yale University School of Medicine. Research involves investigating neural correlates of emotion, stress, and hormones using the combination of functional Magnetic Resonance Imaging (fMRI) and stress hormone monitoring. In addition, we have a digital study that delivers nationwide digital interventions using telehealth and smartphone app applications to assess and treat mental health conditions related to stress, emotion, and addiction in a real-life setting.

Qualifications:
- Bachelor’s degree (related fields such as pre-medical, psychology, neuroscience, biology, computer science, or other fields with relevant experience)
- Academic excellence or excellent computer programming skills
- Strong computer and data organization skills
- Comfortable with various software packages
- Motivated to learn more about medical and biological research
- Good interpersonal and communication skills

Responsibilities:
- Data collection and analysis (neuroimaging, digital assessments, smartphone app data)
- Assisting in fMRI scanning and research
- Subject recruitment and data management
- Opportunities to work with various healthy individuals and clinical patients
The anticipated start date is around June 2022 or earlier. Interested candidates should send a statement of purpose and curriculum vitae (including GPA and a list of three references) to Dr. Dongju Seo (dongju.seo@yale.edu).
