

Research Associate BS/MS – Biochemistry/Enzymology at Novartis

Location: Cambridge, MA

Functional Area: Research & Development

Job Type: Full Time

Job Description:

Novartis Cardiovascular and Metabolism department is looking for a highly motivated and capable individual to join the Analytical and Biochemistry group. The candidate will be responsible for developing biochemical, biophysical, and bioanalytical assays to characterize potential therapeutic molecules. Additional responsibilities include timely documentation of work and presentations in cross-functional project teams.

Minimum Requirements:

B.S. or M.S. in Analytical chemistry, Biochemistry, or related life science field. Experience in enzyme kinetics, biochemical and biophysical assay development is desirable. Knowledge and hands-on experience with GPCR targets are a plus. In addition, experience in enzyme/protein purification and modern biophysical/analytical techniques, such as fluorescence spectroscopy, surface plasmon resonance, calorimetry, and LC-MS are a plus. Must be self-motivated and detailed-oriented. Must have excellent written and oral communication skills and demonstrate ability to work both independently and as part of a team and exhibit strong problem solving skills.
