

BS/MS Scientist Cell Pharmacology Associate: CVM at Novartis

Location: Cambridge, MA

Functional Area: Research & Development

Therapeutic/Disease Area: Cardiovascular and Metabolism

Job Type: Full Time

Job Description:

The Cardiovascular and Metabolic (CVM) Disease Area is seeking a highly qualified and motivated scientist to join the Cell Pharmacology group. The responsibilities of this position include the development and execution of cell based assays, cellular biomarker discovery, mechanism of action and target validation studies, isolation of primary cells and ex vivo tissue analysis in support of pre-clinical CVM programs. The candidate will also be expected to assist in writing of research documents, publications and presentation of data.

Minimum Requirements:

Qualified candidates should possess a MS degree in biochemistry, molecular or cell biology or a related field, or a BS degree and 3 years of laboratory experience is required. Experience working with mammalian cells, cell based assay development or fluorescence microscopy, is preferred. Excellent communication and interpersonal skills, and the ability to work effectively in a team environment are essential. A record of accomplishment, as demonstrated by publication(s) or abstract (s), is required.
