

BS/MS Scientist In Vivo Pharmacology Associate: CV & Metabolic disease at Novartis

Location: Cambridge, MA

Functional Area: Research & Development

Therapeutic/Disease Area: Cardiovascular and Metabolism

Job Type: Full Time

Job Description:

There is an immediate opening for an experienced scientist to join our cardiovascular and metabolic disease research team. The candidate would be responsible for in vivo pharmacology studies, including in vivo model development and compound screening in pharmacodynamic and efficacy models. Additional experience with ex vivo or in vitro assays would be an advantage.

The candidate will be expected to work both independently and collaboratively as part of an in vivo pharmacology team. In addition, the candidate will be expected to contribute to experimental design, independent data analysis and interpretation, and generation of internal reports.

Minimum Requirements:

BS/MS in pharmacology, physiology, neurobiology, cell biology, molecular biology, or related fields, with at least 5 years of relevant experience. The candidate must have extensive hands-on experience in in vivo pharmacology, preferably in animal models of cardiovascular or metabolic diseases. Industry experience is a plus.

The candidate must be highly self-motivated, work in teams, possess good interpersonal skills and have excellent oral and written communication.
