

[Lab Manager Position available at the Morality Lab at Boston College](#)

The Morality Lab at Boston College (<http://moralitylab.bc.edu/>) is looking for a full-time lab manager to begin work Spring/Summer 2015. We are looking for applicants who have prior experience with computer programming (e.g., MATLAB, Psychtoolbox, python, java) or are confident that they can learn on their own. We are also looking for applicants who are independent, passionate about science, and enjoy working with others. Prior research experience, including familiarity with experimental design and statistics, particularly in neuroscience, is a major plus. Current approaches in our lab include fMRI, TMS, eye-tracking, studying patient populations, and behavioral testing. Some examples of current research topics include social cognition for competition versus cooperation, the distinct functions of moral norms, the representation of moral beliefs versus factual beliefs and opinions, and the role of episodic simulation and memory in prosocial behavior.

Please email Liane Young (liane.young@bc.edu) with the following information if you are interested in applying: (1) CV, (2) cover letter with contact information for three references. Please include in your application a brief description of your computer skills and ability to learn new software tools quickly as well as your interests in psychology and/or neuroscience. Applications received by May 11 will receive full consideration, and review of applications will continue until the position is filled.
