Internships at
Federal Statistical
Agencies in
Washington, DC**

**Joint Program in Survey
Methodology**

A Consortium of
University of Maryland,
University of Michigan,
Westat

National Competition Summer 2015

If you like using numbers to learn about people, the economy and world events, and you have completed your sophomore or junior year as of June 2015 with a strong academic record, there is an opportunity in Washington DC waiting for you.

The Joint Program in Survey Methodology (JPSM), a consortium sponsored by the Federal Statistical Agencies, is conducting a nationwide search for a limited number of Junior Fellows. This unique experience combines a paid research assistantship with ongoing educational seminars.

Successful applicants will work in one of the Federal Statistical Agencies in the Washington, DC area during the summer of 2015. This internship will let you learn how data gathered from households and economic units are used to track and identify trends.

You will work on key indicators of unemployment, crime, consumer prices, population migration and growth, agricultural production, educational performance of young people, transportation trends, or a host of other topics. A salary of \$4,500-\$5,000 for 10 weeks and apartment style dormitory housing will be provided.

As a JPSM Junior Fellow you will participate in seminars on survey methodology and explore career options in survey research, which may include JPSM-sponsored graduate degree programs in survey methodology.

Applicants for the Junior Fellow positions should submit a personal statement of no more than one page (500 words), academic transcript, and one faculty recommendation.

The application process opens October 1, 2014 and ends December 31, 2014, 5pm ET.

For application forms and more information,
visit the JPSM web page at:
