

The Yale Autism Program at the Yale Child Study Center in the Yale School of Medicine is interested in recruiting highly qualified students from Harvard for an exciting pre-doctoral fellowship for current graduates or graduating seniors. The positions will commence June 2015 and will be 2 years in duration.

Successful applicants will be involved in a 2-year program of training involving clinical and research experiences. Fellows will be responsible for assisting in a variety of research activities in the lab and for completing experimental protocols with children at risk for autism and their families. With research mentorship, selected applicants will be expected to guide a pre-determined project of research from the point of data collection through analysis and publication of results.

Interested students should send materials no later than February 21st in order to be considered for the position.

Additional information on each fellowship can be found on our website here:
