

Full time Research Coordinator at the EAT Lab:

Dr. Levinson, the Director of the Eating Anxiety Treatment (EAT) Lab at the University of Louisville (UofL), is hiring a full-time research coordinator. The position will involve working with clinical participants with eating disorders on a NIH funded study building a new precision treatment for eating disorders and identifying how individual treatment mechanisms relate to public health outcomes, individual disease burden, medical comorbidities, and social determinants of health. This position will also involve working on grant proposals and publications, conducting diagnostic assessments, assisting with data preparation, assisting with institutional review board protocols, and working with a large interdisciplinary team at UofL. The study coordinator will work very closely with Dr. Levinson and her team on a day-to-day basis.

Opportunities for involvement in publications and presentations at national conferences are available. Minimum experience is a bachelors' degree in psychology or a related field. Research experience is a must. This position is ideal for someone wanting to go to graduate school in a health-related field. This is a 2-year position with potential for 5 years depending on funding and performance.

Interested applicants should send their CV, a cover letter, and names and contact for 3 references to Dr. Levinson at cheri.levinson@louisville.edu and CC emma.crumby@louisville.edu. More information on the EAT lab here: www.louisvilleeatlab.com.

Deadline is rolling and will end Nov 15 or when the position is filled. Start date is negotiable but ideally at the beginning of 2024 or earlier.
