Laureate Institute for Brain Research

NeuroCognitive aspects of  
Anxiety, Trauma, and Treatment

# JOIN OUR TEAM!

## CLINICAL RESEARCH ASSISTANT

- 1 The research mission of the lab is to conduct translational neuroscience research that has the potential to inform our understanding and optimization of psychotherapy interventions.
- 2 By taking a strength-based approach, we seek to understand how to enhance positive mental health.
- 3 Among our highest values is having engagement and input from diverse brains, backgrounds, and viewpoints, which will enable us to tackle important research questions in ways that most benefit the community.
