

CLINICAL RESEARCH COORDINATOR I - (T240435)

Description

The University of Alabama at Birmingham (UAB), Psych - Behavioral Neurobiology, is seeking a Clinical Research Coordinator I. Duties will include recruiting participants, collecting data from participants, processing IRB protocols, and analyzing and processing behavioral and neuroimaging data.

General Responsibilities

- To serve as coordinator for studies and provide support to other team members within the confines of the protocol as directed.
- To support screening and participant eligibility determination, working with more senior team members to ensure compliance.
- To conduct activities in accordance with the protocol, regulations and Good Clinical Practice (GCP).
- To assist with the study life cycle from start-up to closure, i.e., collecting and recording data, recruiting and performing follow-up with participants, scheduling visits and assisting in coordination of lab and fieldwork.
- Performs other duties as assigned.

Annual Salary Range: \$43,890 - \$71,320

Qualifications

High School diploma or GED required.

Preferences

- Experience working with clinical samples is preferred.

UAB is an Equal Employment/Equal Educational Opportunity Institution dedicated to providing equal opportunities and equal access to all individuals regardless of race, color, religion, ethnic or national origin, sex (including pregnancy), genetic information, age, disability, and veteran's status.
