

The Dekel lab (<https://massgeneral.link/DekelLab>) at the Department of Psychiatry of Massachusetts General Hospital studies maternal psychopathology following the singular event of childbirth. Our aim is to develop empirically based therapies and accurate screening tools for early identification of women at risk for postpartum mental illness to lower the odds of maternal morbidity and protect the child at risk.

We are seeking clinical research coordinator(s) to take part in NIH-funded research investigations and related research activities concerning the study of maternal mental psychopathology.

Students are also welcome to contact Dr. Dekel directly (sdekel@mgh.harvard.edu) to learn about research opportunities in our laboratory.

Job Posting Below:

BFT - Clinical Research Coordinator
- (3193712)

Bulfinch Temporary Service, an affiliate of Mass General Brigham, is committed to supporting patient care, research, teaching, and service to the community. We place great value on being a diverse, equitable and inclusive organization as we aim to reflect the diversity of the patients we serve. At Mass General Brigham, we believe in equal access to quality care, employment and advancement opportunities encompassing the full spectrum of human diversity: race, gender identity, sexual orientation, ability, religion, ethnicity, national origin and all the other forms of human presence and expression that make us better able to provide innovative and cutting-edge healthcare and research.

GENERAL SUMMARY/ OVERVIEW STATEMENT:

Under the direct supervision of the Principal Investigator in the Dekel Laboratory, the full-time Clinical Research Coordinator (CRC) in the Department of Psychiatry Neuroscience division will work on clinical and translation research projects concerning maternal mental health and postpartum psychopathology. This individual will assist in a neuro-imaging project and a clinical trial to optimize maternal wellness following childbirth. They will also assist in subject assessments and study recruitment, grant preparation, research protocol maintenance and other research-related tasks. The individual will have opportunities to take part in manuscript writing of peer-reviewed journals and co-author scientific papers.
