

Research Specialist at the University of Wisconsin-Madison

The Gernsbacher Lab, directed by Dr. Morton Ann Gernsbacher, is seeking a part-time (50-75% appointment) Research Specialist to begin the Summer of 2023. The lab examines cognitive neuroscience, human attention, and communication.

Candidates should have a B.A. or B.S. in psychology or a related field; at least one year of experience in a research environment; experience with computer networks and Internet-based platforms (e.g., Qualtrics, Amazon webservices); working knowledge of statistical analysis software (e.g., SPSS or R) and minimal knowledge of database management (e.g., Excel); demonstrated ability to interact effectively with research personnel preferred. At least one year of experience supervising others preferred.

Principal Duties include:

45% Assist Research Support & Development of New Studies

- Oversee the development and implementation of research projects
- Submit IRB protocols and renewals
- Manage recruitment efforts
- Contribute to data collection and analysis
- Manage participant remuneration
- Contribute to manuscript production
- Administer and code research protocols
- Create, review and revise lab protocols
- Ensure secure data files, and secure backups

40% Administrative Lab Tasks

- Serve as lab's primary contact
- Supervise undergraduate research assistants and student hourlies
- Manage all lab finances including cash advances, purchases, grants management, license and membership renewals, reimbursements, etc.
- Assist with all ongoing research project efforts of Dr. Morton Ann Gernsbacher

15% Research Liaison

- Draft materials for new and existing projects
- Maintain campus and community relationships and collaborations
