

## Lab Manager/Research Specialist

Rutgers University, Dr. Qiong Zhang

There is a full-time lab manager/research specialist position available in the lab of Dr. Qiong Zhang, to begin around September 1<sup>st</sup> at Rutgers University, New Brunswick. Responsibilities (90% research , 10% management) encompass a wide range of tasks, including designing, programming, and executing behavioral and EEG experiments, data analysis, subject recruitment. The lab manager will be assisting with studies of how human search their memories, and design methods to further improve their recalls. Depending on qualifications/interest, the lab manager may also assist with developing computational models of memory. For more information on research in Dr. Qiong Zhang's lab, see <https://qiongzhang.github.io/research.html>

To apply, please email [qiongz@princeton.edu](mailto:qiongz@princeton.edu) a cover letter, a resume or CV, and the names and email addresses for two academic or professional references. Review of applications will continue until the position is filled. A two-year commitment is strongly preferred.

Requirements: A bachelor's degree in psychology, neuroscience, computer science, or a related quantitative field (e.g., physics, engineering, math) is required.

Preferred Qualifications: Familiarity with computational modeling, strong programming skills.
