

LABORATORY MANAGER, College of Arts & Sciences, Psychological & Brain Sciences, Boston University

Tracking Code

23500603300819

Job Description

The Quantitative Psychopathology Lab in the Department of Psychological and Brain Sciences at Boston University is seeking a lab manager to support our research on application and development of novel quantitative methods to understand affective psychopathology, particularly among minoritized individuals. The position will offer exposure to all stages of scientific activities such as grant submission, IRB proposal, participant recruitment, data management, and opportunities for authoring/co-authoring presentations and publications. The lab manager will also participate in development, implementation, and management of effective practices to facilitate day-to-day lab operations and administration. Individuals who can solve problems independently, demonstrate strong initiative, attend to details, have strong computational and statistical skills are strongly encouraged to apply and, if interested, will receive close mentoring for future careers in quantitative/clinical psychology and related fields.

Required Skills

- Bachelor's degree required
- 1-3 years of experience
- Programming (e.g., R, C++, Matlab, Python) and other quantitative skills
- Prior research or project management experiences including with EMA, EEG/fNIRS, and community-based participatory research

We are an equal opportunity employer, and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, age, national origin, physical or mental disability, sexual orientation, gender identity, genetic information, military service, pregnancy or pregnancy-related condition, or because of marital, parental, or veteran status. We are a VEVRAA Federal Contractor.
