

Lab Manager in the Women, Immunity and Sexual Health (WISH) Lab at the University of Nebraska-Lincoln

The Women, Immunity and Sexual Health (WISH) Lab at the University of Nebraska-Lincoln (PI: Tierney Lorenz, <https://wishlab.unl.edu/>) invites applications for a full-time Research Specialist. The lab uses psychophysiology, biosample collection and analysis, clinical interviewing, and surveys to examine the interactions between women's sexual, mental and physical health. The successful candidate will play an integral role in every stage of research, including (1) recruitment and collection of human subject data, (2) assay of biosamples for immune and endocrine factors, (3) analysis of data, and (4) assisting in the preparation of grants and manuscripts. In addition, in their managerial capacity they will perform administrative duties (e.g., IRB administration, purchasing) and help train and supervise lab personnel (e.g., undergraduate research assistants; lab technical staff in other units collaborating with the WISH lab). There are resources including dedicated time to conduct independent research, co-author manuscripts, and present research at professional conferences. This position is ideal for individuals interested in pursuing graduate studies in psychology and/or neuroscience, as it will foster expertise in a variety of theoretical and methodological approaches in these fields

The University of Nebraska-Lincoln seeks to attract and retain a high performing and collaborative workforce. UNL is committed to providing a work environment and culture that fosters personal and professional success where every person and every interaction matters. The University is proud to be one of Nebraska's preferred and largest employers where individuals are able to participate and contribute to their full potential.
