

Lab manager position in Perception & Brain Dynamics Laboratory at NYU Medical Center

The Perception & Brain Dynamics Laboratory (<http://www.med.nyu.edu/helab/>) at New York University School of Medicine is looking for a lab manager to start in spring/summer 2020. The Laboratory is within the Neuroscience Institute at NYU Langone Health (<http://www.med.nyu.edu/neuroscience>), affiliated with Departments of Neurology, Neuroscience and Physiology, and Radiology. Our research focus is on understanding the neural bases of perceptual awareness using multimodal imaging (fMRI, MEG, EEG, ECoG) and stimulation (tDCS, TMS) techniques in humans, combined with computational neuroscience approaches.

We are looking for a bright and driven candidate with a Bachelor's or Master's degree who is dedicated to neuroscience research. A variety of backgrounds, including neuroscience, biology, psychology, and computer science is possible, and experience with programming is highly desirable. In addition, the ideal candidate has high responsibility and dependability, as well as excellent critical thinking, organizational and leadership skills. Performing independent research is an important aspect of the position, in addition to lab management duties. A minimal commitment of 2 years is required.

Interested candidates please send a cover letter, a CV, undergraduate and/or graduate transcript, and names and contacts of two to three referees, to Prof. Biyu J. He at biyu.jade.he@gmail.com, with the subject line "Lab manager application 2020". The application is rolling, so please submit your materials as soon as possible.
