

Full-Time Project Coordinator
Binghamton University (SUNY) Mood Disorders Institute

The Binghamton Mood Disorders Institute, directed by Dr. Brandon Gibb, is seeking to hire a full-time post-baccalaureate Research Assistant to start as soon as possible. This is a full-time position to assist with an NIMH-funded R01 examining early markers and mechanisms of risk for the intergenerational transmission of depression during the postpartum period (6-24 months postpartum). Duties will include coordinating participant recruitment, preparation of study materials, and conducting participant assessments (diagnostic and life events interviews, eye tracking, psychophysiology, behavioral coding, etc.). The research assistant will also have opportunities to co-author scientific papers and journal articles. Salary will be \$40,000 per year plus health insurance. There is also a travel budget of \$1000 per year for conferences. For more information about the lab, please visit depression.binghamton.edu

Qualifications include a BA/BS in psychology, neuroscience, or other related field. Successful candidates will demonstrate a conscientious work style and strong interpersonal skills. Candidates with experience working with infants or with experience with eye tracking, psychophysiological assessments, and/or structured diagnostic interviewing are particularly encouraged to apply. This is an excellent position for a college graduate who is interested in gaining additional research experience before going on to graduate study in clinical or developmental psychology.

Review of applications begins immediately and will continue until the position is filled. [Click here to view the job posting and apply online!](#)
