BROWNHealth UNIVERSITY

ADOLESCENT MENTAL HEALTH COLLABORATIVE | DEPARTMENT OF PSYCHIATRY AND HUMAN BEHAVIOR

RESEARCH ASSISTANT | PROJECT CARE

Start date: 1/1/27 • **Position:** Full-time, expected 2 years • **Location:** Providence / East Providence, RI

Brown University's Adolescent Mental Health Collaborative (AMHC), directed by Dr. Jennifer Wolff, is seeking a motivated and enthusiastic Research Assistant to join **Project CARE**, an NIH-funded research study focused on improving support for adolescents and their families following psychiatric hospitalization. The study includes clinical interviews, parent-adolescent interaction tasks, and daily smartphone-based assessments.

This is an excellent opportunity for individuals interested in clinical psychology, child and adolescent mental health, and suicide prevention research, particularly those considering graduate training in psychology or related fields. RAs

PRIMARY RESPONSIBILITIES

- Recruit and enroll adolescents and caregivers participating in the study.
- Conduct research assessments, including interviews and parent-adolescent interaction tasks.
- Coordinate participant scheduling, follow-up assessments, and ongoing study participation.
- Monitor daily smartphone-based assessments and maintain accurate research records.
- Assist with data management, quality assurance, and regulatory documentation.
- Collaborate with a multidisciplinary research team on study activities and research projects.

QUALIFICATIONS

- Bachelor's degree in psychology, neuroscience, public health, or a related field required.
- Prior experience in a clinical or research setting preferred.
- Excellent organizational, communication, and interpersonal skills.
- Strong attention to detail, reliability, and ability to work independently and as part of a team.
- Experience working directly with adolescents and families.
- Familiarity with REDCap or other research databases is a plus.
- Valid driver's license and access to a car are required; some driving is necessary for study activities.
- Some flexibility in scheduling, including occasional evenings or weekends, may be needed.

This full-time position carries an expected two-year commitment and offers hands-on clinical research experience, professional development, and the opportunity to contribute to improving care for adolescents at risk for suicide.

TO APPLY: Please submit a resume/CV and brief cover letter describing your interests and relevant experience to caitlyn_sebastian@brown.edu
