

## Neuroscience Research Associates Program at New York University

Neuroscience labs across NYU and NYU Langone Health are seeking Research Associates for 2026.

We are currently seeking to hire outstanding college graduates as research associates, with positions starting Summer 2026. The Research Associate position is a paid, full-time position with benefits and RAs typically work in a lab for 2 years in preparation for applying to graduate school (PhD and MD PhD programs).

**[More detailed information, the link to the application portal, and a list with labs participating this cycle can be found on our program's webpage.](#)** By creating one central place for applications, we hope to make it easier for promising candidates to apply. **The application deadline is 4/30/26** and applications are shared with our faculty on a rolling basis.

As a Research Associate you will:

- Work on projects led by world-class scientists
- Gain valuable technical skills and research experience
- Participate in weekly seminars hosted by our neuroscience community
- Engage with grad students, postdocs, and PIs in your field
- Attend panels and workshops to help prepare for grad school applications

Research disciplines include:

- Cognition & behavior
- Developmental biology
- Molecular biology
- Physiology
- Computational neuroscience
- Genetics
- Neurodegeneration
- Systems neuroscience

Applications Open: January 15, 2026

Compensation: Starting at \$47,033.90 + benefits
