

Research Assistant: University of North Carolina at Chapel Hill TEACCH Autism Program

This full-time research assistant position involves assisting Drs. Laura Klinger, Brianne Tomaszewski, and Brenna Maddox in research activities for two federally funded intervention research projects at the University of North Carolina at Chapel Hill TEACCH Autism Program. This position involves assisting in research activities focused on the translation or implementation of evidence-based practices to community settings. Fifty percent of this position will involve working on a clinical trial examining the effectiveness of the TEACCH School Transition to Employment and Postsecondary Education (T-STEP) program for high school and college students on the spectrum. The other fifty percent of this project will involve research on the effectiveness of 1) mental health interventions for autistic individuals with co-occurring psychiatric conditions, and 2) the associated implementation strategies. Activities for all areas of research will involve assisting project coordinators with participant recruitment, conducting assessments around the state of North Carolina, data collection and entry, and preparation of research presentations and manuscripts.
