

The Storch Lab at Baylor College of Medicine (Houston, TX) will be opening up a number of Research Coordinator positions and is excited to invite passionate and skilled individuals to join our team. As a Research Coordinator, you will play a pivotal role in our ongoing obsessive-compulsive and anxiety disorders research. Our research studies include CBT studies for treatment of anxiety and OCD in youth, affective computing, genetics of OCD, and other innovative projects.

Key Responsibilities:

- **Coordination:** Facilitate communication and coordination within individual studies, between collaborating institutions, and other internal and external stakeholders.
- **Study Management:** Oversee data collection, regulatory needs, or other crucial aspects of current projects.
- **Participant Recruitment:** Engage in patient recruitment through phone screening, community and professional outreach as well as contribute novel approaches to retention and recruitment.
- **Adaptability:** Embrace additional duties as assigned and drive innovation, contributing to the fast-paced and dynamic nature of our research environment.

Opportunities for Growth: Beyond the core responsibilities, our Research Coordinators have the opportunity to:

- Participate in other exciting projects within the lab including mentoring undergraduate interns.
- Contribute to the publication of peer-reviewed articles and poster presentations.
- Engage in clinical assessments.
- Receive on-going professional mentorship.

Ideal Candidates: This position is ideal for individuals with an undergraduate degree in psychology or related field and a keen interest in pursuing graduate education in psychology, medicine, or related professions. As such, this position is intended for candidates who have not completed a graduate-level degree (e.g., a Master's Degree). Candidates should demonstrate effective planning, interpersonal skills, and a continuing desire to learn. GPA of 3.5 and above. If you are passionate about making a meaningful impact in the field of mental health research, we strongly encourage you to apply.

Timeline: We are looking to have Research Coordinators start in Summer 2026. The ideal candidate is able to commit to two years.
