

Research Coordinator in the Youth Collaborative Lab at the Medical University of South Carolina

The Youth Collaborative Lab located within MUSC in Charleston, South Carolina is hoping to hire a full-time research coordinator. The candidate will work as a Lead Recruitment Manager across multiple sites for a large treatment study focused on youth substance use. Additionally, this is a great opportunity for people trying to figure out where their interests in psychology (or related fields) may be before applying. Recent alumni of the lab have attended graduate programs for clinical psychology, nursing, counseling, social work, medicine, physical therapy, pharmacy, and more. If anyone is interested in the position, they can directly reach out to our lab manager Cori Herring (herrinco@musc.edu) or apply through the following [link](#):
