

## **Research Coordinator in the Cognitive Dynamics Laboratory at UC San Diego**

The Cognitive Dynamics Laboratory at UC San Diego (Department of Psychiatry) is recruiting a Staff Research Coordinator to support clinical research with individuals with serious mental illness, including mood and psychotic disorders. The position focuses on studies using digital health strategies to improve cognitive function.

Responsibilities include recruitment and screening, administering structured clinical interviews and cognitive/diagnostic assessments, collecting mobile technology data, maintaining REDCap databases across multiple projects, preparing IRB and funding agency progress reports, training research assistants, and coordinating with linked study sites.

The role is ideal for someone with a bachelor's degree in psychology or a related field, experience administering structured psychiatric interviews, and familiarity with REDCap. Prior experience working with individuals with schizophrenia or bipolar disorder is valued, alongside experience with therapeutic treatment approaches and skills.

This is a full-time in-person career appointment based in La Jolla (San Diego), CA. Hiring pay scale is \$31.23–\$35.89/hour.  
Filing deadline is Thursday, May 7, 2026.
