

Research Assistant Positions in the Radcliffe Research Partnership

As a Harvard College student, you can be part of a research program that students have called “rewarding,” “unique,” and “amazing.” You can work side by side with a Radcliffe Fellow.

Our Radcliffe Research Partners program matches students with leading artists, scholars, scientists, and professionals.

The partnership is designed to be mutually beneficial. Fellows act as mentors, while students provide research assistance, acquire valuable research skills, and participate in the Institute’s rich intellectual life.

The partnerships mirror the multidisciplinary nature of the Institute with project topics in

- the arts;
- gender studies;
- the humanities and social sciences;
- public policy; and
- STEM research.

Below are some of opportunities that may be of interest:

1. [Intersectionality of Gender and Autism](#)

This project aims to reframe how we understand the intersectionality of autism and gender.

2. [Digging for Hope in Mexico: A Feminist Ethnography in the Land of Mass Graves](#)

This project involves an ethnographic account of family collectives searching for their disappeared loved ones throughout Mexico.

3. [Seeing with Songs: The Hidden World of Whales](#)

Although involving other mammals, students will learn about modern techniques of bioacoustics signal processing and scientific approaches to testing hypotheses using computational methods, while contributing to a multidisciplinary, cross-university/international research project.

As a Radcliffe research partner, you will be paid \$18.00 per hour and work an average of 8 to 12 hours a week under the supervision of a Radcliffe fellow.
