

Research Coordinator in CAN Lab at the University of Georgia

We are seeking to hire a full-time research coordinator in the Clinical Affective Neuroscience Laboratory at the University of Georgia. Please spread the word to anyone looking for a postbacc job. These positions are perfect for individuals looking to become more competitive before applying for clinical psychology or neuroscience PhD programs.

The coordinator will be responsible for day-to-day project duties, such as recruitment, clinical interviewing, neuropsychological testing, administering fMRI tasks, data management, and processing. Skills to be learned on the job will be beneficial for grad school preparation (eg administration of fMRI tasks and processing/analyzing data, clinical interviewing, statistics) and the coordinator will have opportunities to publish papers/make conference presentations to become more competitive for grad school.

Salary is \$47k per year, with an expectation of a minimum 2-year commitment. Start date is flexible. Individuals who have recently graduated or graduating in spring of 2025 are eligible to apply.

Research in our lab primarily focuses on the phenomenology, etiology, assessment, and treatment of negative symptoms in adults diagnosed with schizophrenia and youth at clinical high-risk for psychosis.

More information about our lab can be found at: <https://ugacanlab.com>
