

Research Intern Application

The Recovery Research Institute at the Massachusetts General Hospital, Harvard Medical School is recruiting candidates for a **1-year (or more) remote, volunteer internship (≥ 10 hours/week) to begin in early 2022**. This person will assist with various research tasks ranging from project management on National Institute of Health (NIH) funded studies, data entry, scientific literature reviews, and other administrative duties. These tasks require abilities to engage in problem solving and innovative thinking; as well as clear and timely communication and flexibility. If desired, students may receive credit from their university for internship participation.

Please fill out this application and email it back to Alexandra Abry (aabry@mgh.harvard.edu). Please include a copy of your curriculum vitae, and if still in college, an unofficial copy of your transcript.

Recovery Research Institute – Massachusetts General Hospital & Harvard Medical School

Why are you interested in working at the Recovery Research Institute?

What are your plans for further education (if any), and/or what are your career goals?

What skills or previous research experience do you have that would make you an asset to the Recovery Research Institute team?

What do you hope to gain from your experiences at the RRI?

WHO WE ARE

Founded in 2012 by Dr. John F. Kelly, the Recovery Research Institute is a team of highly innovative and rigorously trained scientists working through research, education, and outreach, to enhance addiction recovery through science. Known as a leader in the field of addiction science, the RRI has extensive experience in the scientific investigation of substance use disorder mechanisms and processes. Since its inception, the Recovery Research Institute has won over 20 federal grants and published over 100 research articles. The Recovery Research Institute is a non-profit entity of Massachusetts General Hospital and Harvard Medical School.
