

Research Positions in the Affective & Clinical Neuroscience Lab at Northwestern University

Project Coordinator Research Position

We are hiring one (1) full-time with benefits project coordinator. The project coordinator will oversee study procedures, participant recruitment and retention, manage data collection, and supervise research assistants to ensure the success of the study.

The ideal applicant will have a BS/BA and/or a Master's degree and prior experience coordinating large-scale research studies. This is a term position ending on May 31, 2028. Opportunity for renewal will be based on funding availability and performance.

Full-Time research Assistant

We are hiring up to three (3) full-time, with benefits, research assistants. These research assistant positions involve collecting and managing multimodal (self-report, behavioral, immune, and neuroimaging) data from adolescents and their parents, while also carrying our study procedures, conducting literature reviews, and completing administrative tasks.

This is an ideal position for a candidate interested in gaining hands-on experience before pursuing medical school or a PhD program in neuroscience, psychology, or a related field.
